

线程池错误:

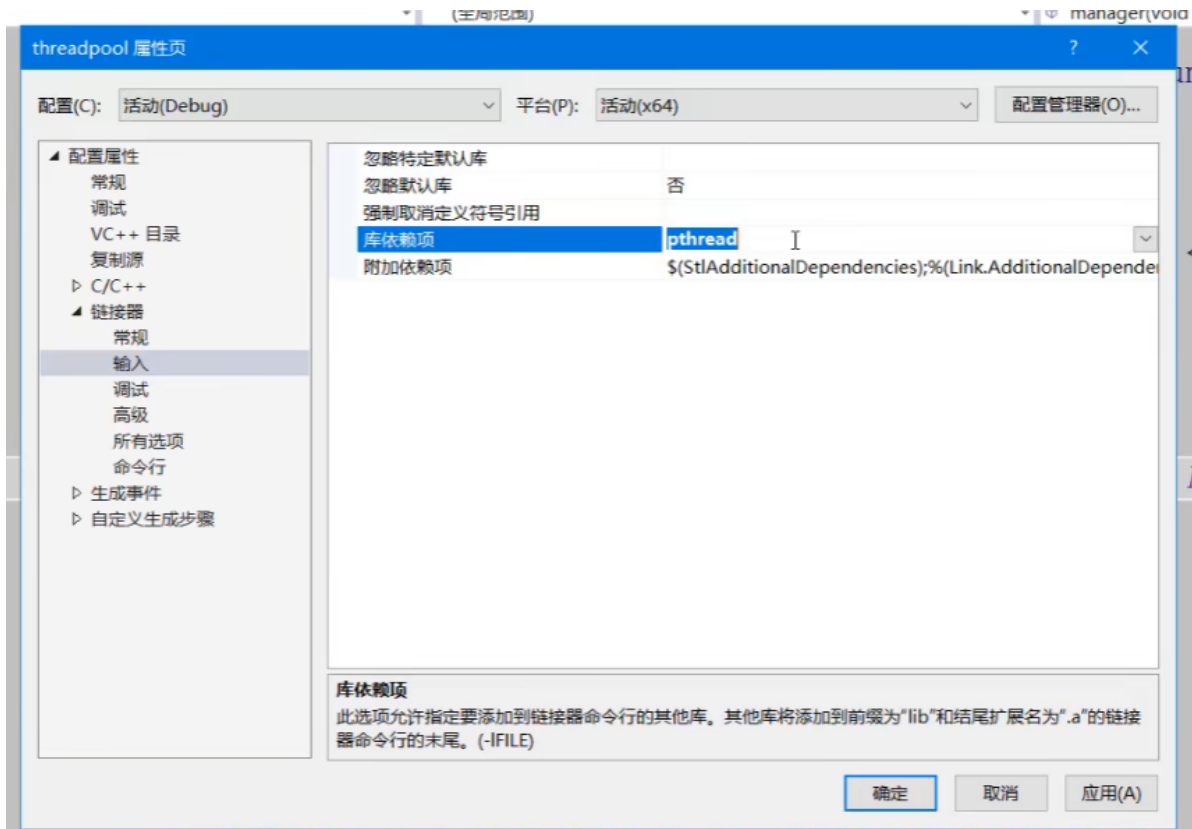

```
1>正在链接对象
1>C:\Users\Kevin\Desktop\threadpool\threadpool\obj\x64\Debug\threadpool.o : error : In function 'threadPoolCreate':
1>C:\Users\Kevin\Desktop\threadpool\threadpool\threadpool.c(84): error : undefined reference to 'pthread_create'
1>C:\Users\Kevin\Desktop\threadpool\threadpool\threadpool.c(87): error : undefined reference to 'pthread_create'
1>C:\Users\Kevin\Desktop\threadpool\threadpool\obj\x64\Debug\threadpool.o : error : In function 'threadPoolDestroy':
1>C:\Users\Kevin\Desktop\threadpool\threadpool\threadpool.c(110): error : undefined reference to 'pthread_join'
1>C:\Users\Kevin\Desktop\threadpool\threadpool\obj\x64\Debug\threadpool.o : error : In function 'manager':
1>C:\Users\Kevin\Desktop\threadpool\threadpool\threadpool.c(266): error : undefined reference to 'pthread_create'
```

没有连接动态库

gcc 编译时 -lpthread 指定库的名字

vs编译前指定库

解决C语言重复定义：multiple definition of“xxx”问题

产生这个错误的原因是**重复定义**

在threadpool.h中

```
const int NUMBER = 2;
```

threadpool.c和main.c中都include "threadpool.h"

导致

multiple definition of NUMBER
